# EXTRA CENSUS BULLETIN.

No. 64.

WASHINGTON, D. C.

December 19, 1893.

## STATISTICS OF FARMS, HOMES, AND MORTGAGES.

### MORTGAGES—SUMMARY FOR 33 STATES AND TERRITORIES.

DEPARTMENT OF THE INTERIOR,

CENSUS OFFICE,

WASHINGTON, D. C., November 28, 1893.

SIR:

The tabulation of about five-sixths of the real estate mortgage debt of the United States has been completed, and a summary for the 33 states and territories in which this debt is found is contained in this bulletin. The mortgage movement in these states and territories was a progressive one that had no break except in 1888. In 1880 the incurred debt was \$539,646,250 and in 1889, \$1,381,684,380. The years 1887 and 1889 were exceptionally productive of mortgages. From 1880 to 1889 the incurred real estate mortgage debt increased 156.04 per cent.

Upon separation of the debt into that which incumbered acre tracts and that which incumbered lots, it is noticed that both the rate and the amount of increase have been greater in the debt on lots than that on acres. The amount of incurred debt incumbering lots in 1880 was \$286,387,443, and there was an increase to \$962,745,227 in 1889. In 1880, 319,513 lots were mortgaged; in 1889, 997,263 lots. The debt incurred on acre tracts rose from \$253,258,807 in 1880 to \$418,939,153 in 1889. The number of acres mortgaged in 1880 was 29,706,934; in 1889, 42,556,311.

During the 10-year period a debt of \$9,469,167,081 was incurred, represented by 6,947,113 mortgages; 37.74 per cent of the debt was on acre tracts and 62.26 per cent on lots.

The real estate mortgage debt existing January 1, 1890, is \$4,935,455,896, of which \$1,686,272,279, or 34.17 per cent, is on acres and \$3,249,183,617, or 65.83 per cent, is on lots.

The per capita debt of the 33 states and territories appears in the following comparative statement:

Alabama.....	\$26	Minnesota.....	\$152
Arizona.....	39	Missouri.....	80
Arkansas.....	13	Montana.....	66
California.....	200	Nebraska.....	126
Colorado.....	206	Nevada.....	48
Connecticut.....	107	New Hampshire.....	50
Delaware.....	96	New Mexico.....	43
District of Columbia.....	226	New York.....	268
Florida.....	40	Oregon.....	73
Georgia.....	15	Pennsylvania.....	117
Idaho.....	38	Rhode Island.....	106
Illinois.....	100	Tennessee.....	23
Indiana.....	51	Utah.....	39
Iowa.....	104	Vermont.....	84
Kansas.....	170	Wisconsin.....	72
Maine.....	49	Wyoming.....	82
Massachusetts.....	144		

In the ratio between the debt and the true value of all taxed real estate the states and territories compare as is shown below :

	PER CENT.		PER CENT.
Alabama.....	15.44	Minnesota .....	20.69
Arizona.....	4.78	Missouri.....	15.82
Arkansas.....	6.70	Montana.....	4.78
California.....	15.90	Nebraska.....	20.03
Colorado.....	13.08	Nevada.....	4.59
Connecticut.....	16.44	New Hampshire.....	12.12
Delaware.....	15.92	New Mexico.....	11.99
District of Columbia.....	35.86	New York.....	30.62
Florida.....	8.49	Oregon.....	7.52
Georgia.....	7.15	Pennsylvania.....	18.91
Idaho.....	4.33	Rhode Island.....	11.92
Illinois.....	12.36	Tennessee.....	8.80
Indiana.....	9.79	Utah.....	7.14
Iowa.....	16.64	Vermont.....	22.05
Kansas.....	26.83	Wisconsin.....	11.91
Maine.....	13.95	Wyoming.....	18.82
Massachusetts.....	19.32		

In 21 states and territories the average rate of interest on the existing mortgage debt is 6.73 per cent ; on acres, 7.27 per cent ; on lots, 6.32 per cent. From 1880 to 1889 the rate on the incurred debt declined from 6.75 to 6.52 per cent for all mortgages ; for mortgages on acres the rate remained in 1889 where it began in 1880, at 6.78 per cent ; for mortgages on lots the decline was from 6.71 to 6.37 per cent. The acres covered by existing mortgages are 32.09 per cent of the number of taxed acres in 27 states and territories.

In 102 counties distributed throughout the Union, where the reasons why the indebtedness had been incurred were ascertained, it was found that 82.56 per cent of the original amount of the debt (before deducting partial payments) was incurred to secure the purchase of real estate and to make improvements, when not associated with other objects, and that 94.37 per cent of the debt stands for purchase money, improvements, business, and the purchase of the more durable kinds of personal property, when these objects are not combined with any other object in any mortgage.

Very respectfully,

CARROLL D. WRIGHT,  
*Commissioner of Labor in charge.*

THE SECRETARY OF THE INTERIOR.

# STATISTICS OF FARMS, HOMES, AND MORTGAGES.

## MORTGAGES—SUMMARY FOR 33 STATES AND TERRITORIES.

BY GEORGE K. HOLMES AND JOHN S. LORD.

### THE REAL ESTATE MORTGAGES OF 10 YEARS.

With the completion of the tabulation of the real estate mortgages of 33 states and territories, it is desirable to group the chief results for these states and territories in a special bulletin. Nearly seven-ninths of the mortgages made in the United States during the 10 years 1880–1889 are found in these states and territories and about five-sixths of the existing mortgage debt of the whole country. The names of the states and territories embraced in this bulletin are mentioned in the tables.

The progressiveness of the mortgage movement during the decade, from a mathematical point of view, was interrupted only in 1888; but if either that year or 1887 is omitted there is no break in the progression. The years distinguished for expansion of mortgage credit were 1881, 1882, 1886, 1887, and 1889; and 1888 would be noticeable were it not for the year immediately preceding, when the greatest yearly increase of mortgage debt during the decade took place. Commercial depression characterized the three years 1883–1885, which mark the weakest period of the movement. In round millions the increase of incurred debt each year over that of the preceding year appears in the following statement:

1881 over 1880.....	\$120	1881 over 1883.....	\$30	1887 over 1886.....	\$233
1882 over 1881.....	133	1885 over 1884.....	32	1888 over 1887.....	400
1883 over 1882.....	35	1886 over 1885.....	151	1889 over 1888.....	169
a Decrease; increase over 1886, \$173.					

Table 1 shows that during the decade ending December 31, 1889, the real estate mortgages made in the 33 states and territories and mentioning the amount of debt secured numbered 6,947,113 and represented an incurred debt of \$9,469,167,081. The amount of this debt incurred in 1880 was \$539,646,250; in 1889, \$1,381,684,380. The 7,936 mortgages on acres and 5,839 mortgages on lots made in the course of 10 years, not stating the amount of debt secured by them, are not included in any totals except in the number of acres and lots shown in Table 1 and except when otherwise mentioned.

The number of mortgages made yearly varies very nearly as the incurred debt varies. In 1880, 469,700 mortgages stating amount of debt were made and 894,732 mortgages in 1889. The number of mortgages made in 1889 gained 90.49 per cent upon those made in 1880; the amount of debt incurred, 156.04 per cent. During the 10 years preceding June 1, 1890, the population increased 25.75 per cent.

**MORTGAGES ON ACRES.**—A debt of \$3,573,582,435 was placed on acre tracts during the 10 years, or 37.74 per cent of the total for acre tracts and lots, and this amount was represented by 3,357,742 mortgages, or 48.33 per cent of the total number. In the annual amount of mortgages on acres there was an unbroken increase from \$253,258,807 in 1880 to \$454,945,037 in 1887. After a decline to \$395,202,528 in 1888 a resumption of the progressive tendency led to an incurred debt of \$418,939,153 in 1889.

**MORTGAGES ON LOTS.**—Of the total amount of the real estate mortgage debt incurred during the 10 years \$5,895,584,646, or 62.26 per cent, incumbered lots. The amount incurred in 1880 was \$286,387,443; in 1887 it was \$817,723,445. The amount fell to \$817,105,973 in 1888, from which year it rose to \$962,745,227 in 1889. The gain in number of mortgages in 1889 over those of 1880 was 170.37 per cent; in amount of incurred debt, 236.17 per cent.

**NUMBER OF ACRES AND LOTS COVERED.**—During the 10 years 397,013,430 acres were incumbered by 3,365,678 mortgages, stating and not stating amount of debt. In 1880 the number of acres incumbered was 29,706,934; in 1889, 42,556,311; but the largest number of acres covered by mortgage was 47,566,282 in 1887. The increase of 1889 over 1880 in number of mortgaged acres was 43.25 per cent. Lots to the number 6,200,463 were incumbered during the decade by 3,595,230 mortgages, stating and not stating amount of debt; 319,513 in 1880, 997,263 in 1889. Increase of 1889 over 1880, 212.12 per cent.

## EXISTING INDEBTEDNESS.

Table 2 shows that the existing mortgage debt of the 33 states and territories is \$4,935,455,896, of which \$1,686,272,279, or 34.17 per cent, is on acres and \$3,249,183,617, or 65.83 per cent, is on lots. Of the 3,621,787 mortgages in force, 1,683,119, or 46.47 per cent, are on acres and 1,938,668, or 53.53 per cent, are on lots. In Table 3 it appears that mortgages have an average life of 4.814 years: on acres, 4.640 years; on lots, 4.928 years. The amount of the partial payments made on the existing debt in these states and territories is ascertained to be 10.48 per cent of the debt on acres; 13.25 per cent on lots. Total, 12.32 per cent.

**INCREASE OF DEBT.**—What the amount of existing real estate mortgage debt in the United States was in 1880 it is impossible to determine except roughly by a process of reasoning. In 1890, January 1, the debt was about \$6,000,000,000, one-sixth of this amount being an estimate for states not tabulated. As already pointed out, a progressive movement characterized the debt incurred during the decade under consideration, and, if it may be assumed that the life of mortgages and the proportion of partial payments have not changed materially from the beginning to the end of the decade, the following formula may be regarded as approximately sound: the debt incurred in 1889 is to the debt incurred in 1880 as the debt existing January 1, 1890, is to the debt existing January 1, 1880. The character of the mortgage movement during the 8 or 10 years preceding 1880 may qualify the conclusion. The financial history of that period makes it probable that the movement was a diminishing progression, or the reverse of the movement of 1880–1889, and, if so, an estimate of the existing debt of 1880, as proposed, would be too large; but, on the other hand, the financial depression of 1873–1878 must have checked the payment of mortgages, as well as the incurring of debt, and hence prolonged the life of mortgages, perhaps enough to offset the effect of the diminishing progression in the estimate of the existing debt of 1880. At any rate, the formula above stated is the best that can be devised, and it gives the United States an existing real estate mortgage debt of about \$2,343,383,846 January 1, 1880, so that the increase of the existing debt of 1890 over that of 1880 was 156.04 per cent. During this time population increased about one-quarter and wealth about one-half; therefore, the debt increased proportionately three times more than wealth did and six times more than population.

By the same rule the existing debt on acres increased 65.42 per cent during the 10 years and on lots 236.17 per cent; much of the debt on acres is due to their suburban situation, and more properly belongs to the debt on lots, so that the increase of mortgage debt within the 10 years is mostly found in urban growth, which has exceeded nonurban growth in its ratio.

**COMPARISON OF DEBT AND POPULATION.**—The per capita existing debt of the 33 states and territories is \$118. (See Table 4.) New York has the highest amount, \$268, and, in order, the District of Columbia follows with \$226, Colorado with \$206, California with \$200, and Kansas with \$170. The lower amounts are found in the south: \$13 in Arkansas, \$15 in Georgia, \$23 in Tennessee, and \$26 in Alabama.

In Kansas there is 1 mortgage in force to 5 individuals of the population; in Minnesota, 7 individuals; in Nebraska, 7 individuals; in Colorado, 7 individuals; in Iowa, 8 individuals; in the District of Columbia, 10 individuals, and in Vermont, 10 individuals. At the other extreme there are 101 individuals to 1 mortgage in force in New Mexico; 45 individuals in Tennessee; 43 individuals in Alabama; 40 individuals in Arizona; 38 individuals in Arkansas. In relation to population, mortgages are fewer in the south and in the Rocky Mountain region than in the north.

**REAL ESTATE VALUES AND DEBT.**—Final estimates of real estate value are at hand for some of the states, and for the others estimates have been made and tentatively accepted, and results are presented in Table 4. In the 33 states and territories the existing debt is 18.57 per cent of the value of all taxed real estate, mines being included where not taxed. The District of Columbia, New York, and Kansas have the highest percentages, 35.86, 30.62, and 26.83, respectively. The lower percentages are found in the south, in the Rocky Mountain region, in Oregon, and in Indiana.

In some states, as in Colorado and Minnesota, it will be noticed that a high per capita indebtedness goes with a moderate ratio between the existing debt and the value of real estate, mortgaged and not mortgaged. These results are not necessarily inconsistent; they are probably due to a considerable proportion of incumbrance on land owned by nonresidents and also to large unmortgaged individual real estate holdings of residents or nonresidents.

**THE DEBT LIMIT.**—In Table 5 an attempt is made to show how nearly the mortgage debt limit has been reached. For this purpose it is assumed that all real estate may be mortgaged for two-thirds of its value without increasing the rate of interest to cover risk. Real estate of all descriptions will not take such an incumbrance in all parts of the country, but much of it may be incumbered more heavily than this. In these states and territories 27.85 per cent of the debt limit has been reached upon the basis of the assumption made; that is to say, the real estate of the 33 states and territories will stand an incumbrance 3.59 times greater than the actual incumbrance. In the District of Columbia, New York, and Kansas the mortgage debt limit has been approached more nearly than in the other states, namely, to the extent of 53.80, 45.93, and 40.24 per cent, respectively.

**PROPORTION OF ACRES AND LOTS MORTGAGED.**—In 27 states and territories 32.09 per cent of the taxed acres are mortgaged. The percentage runs as high as 61.56 in Kansas and 58.13 in Nebraska; the lower percentages are in the south and in the Rocky Mountain region. (See Table 6.)

Of the number of taxed lots, 23.69 per cent are mortgaged in the total for Illinois, Kansas, Missouri, and Nebraska. Missouri stands highest, with 28.98 per cent; Nebraska lowest, with 20.41 per cent. For the other states and territories the number of taxed lots can not be ascertained.

**RATIOS OF MORTGAGES TO ACRES AND LOTS.**—On each mortgaged acre in the 33 states and territories, on the average, there is an incumbrance of \$9.30; on each mortgaged lot, \$976. In 27 states and territories the debt on acres amounts to \$3.02 to each taxed acre; in 4 states the debt on lots amounts to \$131 to each taxed lot. Details for states and territories are in Table 6.

In the 33 states and territories 108 acres are covered by each existing mortgage on acres, on the average, and 1.72 lots by each existing mortgage on lots.

**GEOGRAPHICAL CONCENTRATION OF DEBT.**—Table 7 has been constructed to show the geographical concentration of debt in 32 states and territories (excluding the District of Columbia) and for the purpose of comparing principal cities with the remainder of each state and territory. The states and territories contain 1,616 counties, while only 72 counties are represented in the table.

Of the mortgage debt incurred in 32 states and territories during the 10 years 1880–1889, 49.66 per cent was placed on real estate in the 72 counties and 55.55 per cent of the existing debt of these states and territories incumbers real estate in the 72 counties. In New York 80.24 per cent of the existing debt is in 7 counties; in Colorado 55.93 per cent is in the county containing Denver; in Illinois 49.84 per cent is in the county containing Chicago; in Minnesota 55.40 per cent is in the 2 counties containing Minneapolis and St. Paul; in Tennessee 67.19 per cent is in 4 counties.

The per capita mortgage debt of the 72 counties is \$221; of the remaining counties of the 32 states and territories, \$74.

Real estate is more heavily incumbered in the 72 counties than outside of them. In these counties the existing mortgage debt is 22.63 per cent of the value of all taxed real estate; outside of them, 15.03 per cent. State and territory details may be found in the table.

**INTEREST ON THE EXISTING DEBT.**—The interest charge on the debt in force has been ascertained for 21 of the 33 states and territories, and is stated in Table 8. The average rate is 7.27 per cent on mortgages on acres; 6.32 per cent on mortgages on lots. Total, 6.73 per cent.

Oregon has the highest rate on mortgages on acres, 9.39 per cent; Pennsylvania has the lowest, 5.63 per cent. The highest rate on mortgages on lots is 9.59 per cent in Oregon; the lowest, 5.38 per cent in Massachusetts.

On each mortgage in force against acres the average annual interest charge is \$66; on each mortgage against lots, \$76. Total, \$71.

## THE MOVEMENT OF AVERAGES AND PERCENTAGES DURING THE DECADE.

**AVERAGE NUMBER OF ACRES TO A MORTGAGE.**—During the decade 1880–1889 each mortgage that was placed against acres in the 33 states and territories covered 118 acres on the average. The average number in 1880 was 109 acres, and the average increased uninterruptedly until it became 122 acres in 1884; then it declined to 118 acres in 1885, increased to 125 acres in 1887, and declined to 117 acres in 1889. (See Table 9.)

**AVERAGE AMOUNTS OF MORTGAGES.**—The average amount of each real estate mortgage made during the 10 years was \$1,363. In 1880 it was \$1,149; it increased to \$1,353 in 1882, fell to \$1,236 in 1885, and rose continuously to \$1,544 in 1889. (See Table 10.)

Each mortgage on acres averaged \$1,064 during the decade. From 1880 to 1883 it increased from \$928 to \$1,091, in 1885 it had fallen to \$972, from which year it rose to \$1,155 in 1889. (See Table 11.)

The mortgages on lots averaged \$1,643 during the 10 years. From 1880 to 1882 the average increased from \$1,455 to \$1,684; in 1885 it had fallen to \$1,506, and in 1889 it had risen to \$1,809. (See Table 12.)

**CLASSIFICATION OF AMOUNTS.**—In 21 states and territories the mortgages on acres and lots for amounts of less than \$1,000 made during the 10 years were 70.21 per cent of the entire number and their amount was 24.04 per cent of the amount of all mortgages; the mortgages for \$1,000 and under \$5,000 were 26.85 per cent of the entire number and 44.02 per cent of the entire amount, while the mortgages for \$5,000 and over were 2.94 per cent of the number and 31.94 per cent of the amount. (See Table 13.)

**RATES OF INTEREST.**—Table 14 shows the rates of interest on the 5,660,010 real estate mortgages made during the decade in 21 states and territories, representing an incurred debt of \$6,216,286,743. These rates, 139 in number, including mortgages bearing no interest, have been reduced to averages in Tables 15, 16, and 17.

The average rate of interest on real estate mortgages fell from 6.75 per cent in 1880 to 6.43 per cent in 1882, from which year it rose to 6.82 per cent in 1887, then fell to 6.52 per cent in 1889. For the 10 years the average was 6.62 per cent.

For mortgages on acres the average rate closed the decade where it began, at 6.78 per cent, in the meantime having declined to 6.45 per cent in 1882 and having risen to 7.01 per cent in 1887. The average rate of the decade was 6.78.

Mortgages on lots bore lower rates than those on acres and showed more frequent variations. The stepping stones of the movement are as follows: 6.71 per cent in 1880, 6.40 per cent in 1882, 6.51 per cent in 1884, 6.48 per cent in 1885, 6.69 per cent in 1887, and 6.37 per cent in 1889. Average for the 10 years, 6.49 per cent.

Percentages of the number and amount of mortgages bearing certain rates and classes of rates of interest are expressed in Tables 18, 19, and 20. The rate of 6 per cent was borne by 26.03 per cent of the number and 31.03 per cent of the amount of the mortgages on acres; by 44.95 per cent of the number and 48.19 per cent of the amount of the mortgages on lots; by 35.33 per cent of the number and 40.63 per cent of the amount of all mortgages.

Rates higher than 6 per cent were borne by 71.41 per cent of the number and 62.71 per cent of the amount of the mortgages on acres; by 48.95 per cent of the number and 33.17 per cent of the amount of the mortgages on lots; by 60.37 per cent of the number and 46.18 per cent of the amount of all mortgages.

Rates higher than 8 per cent were borne by 29.41 per cent of the number and 20.13 per cent of the amount of the mortgages on acres; by 16.40 per cent of the number and 7.08 per cent of the amount of the mortgages on lots; by 23.01 per cent of the number and 12.83 per cent of the amount of all mortgages. The higher rates go with the smaller mortgages, and vice versa.

#### SPECIAL INVESTIGATIONS IN 102 COUNTIES.

As Extra Census Bulletin No. 3 explains at length, special investigations were conducted in 102 counties distributed throughout the Union, and some of the results derived from them are contained in Tables 21, 22, and 23.

**OBJECTS OF INDEBTEDNESS.**—One of the endeavors was to discover why mortgage debt had been incurred, and this was thoroughly successful. No endeavor was made, however, to apportion the debt to two or more objects represented by the same mortgage, as in the case of a mortgage debt incurred to buy real estate and a horse. The conclusions are based on 219,291 existing mortgages whose original amount of debt (before deducting partial payments) was \$324,291,078. To secure the purchase of real estate and to make improvements, not combined with other objects, were the reasons why 80.13 per cent of the existing mortgages were made and why 82.56 per cent of their original amount of debt was incurred. For the objects of purchase money, improvements, business, and the purchase of the more durable kinds of personal property, not combined with other objects, the percentage for number of mortgages is 89.82 and for amount 94.37. Farm and family expenses, standing alone, account for 5.40 per cent of the number of mortgages and 1.73 per cent of their amount.

**NUMBER OF MORTGAGES HELD BY MORTGAGEES.**—A classification of mortgagees according to the number of mortgages held by them is attempted, but not with entire satisfaction. It was impossible to ascertain how the mortgages given to loan agents and mortgage companies were distributed by assignment and the apparent holdings of such mortgagees have necessarily been allowed to stand. It is established, however, that the mortgages, each of which is held by a different mortgagee, are at least 29.60 per cent of the entire number and 31.46 per cent of their original amount; that the mortgages given to mortgagees of 2 mortgages each are at least 10.21 per cent of the number and 12.13 per cent of the amount, and that the mortgages given to mortgagees of 5 or less mortgages each are at least 52.80 per cent of the number and 55.94 per cent of the amount.

**RESIDENCE OF MORTGAGEES.**—Another endeavor in the 102 counties, which was fairly successful, was to determine the proportion of the mortgages made in each county held by residents of the state in which the county is situated. For instance, 84.45 per cent of the mortgages in force against the real estate of Morgan county, Illinois, were given to residents of that state, and these are 78.98 per cent of the amount of all mortgages. Mortgage companies and loan agents, as mortgagees, are regarded as having assigned their mortgages to nonresidents. The conclusion for the 102 counties is that 72.04 per cent of the number of the mortgages were given to state residents and that the amount of these mortgages is 68.69 per cent of the total amount.

**TABLE 1.—NUMBER AND AMOUNT OF REAL ESTATE MORTGAGES MADE DURING THE 10 YEARS 1880-1889 AND NUMBER OF ACRES AND LOTS COVERED: TOTAL FOR 33 STATES AND TERRITORIES, BY YEARS. (a)**

[For existing debt see Table 2.]
